

NovaTech New Hire Onboarding Guide & First 90 Days Roadmap

1. Welcome to the NovaTech Team

Welcome to NovaTech! This onboarding guide is your operational roadmap for navigating administrative tasks, technical provisioning, compliance requirements, and performance milestones during your first 90 days with the company.

2. Day 1 Logistics, Orientation & Account Provisioning

Welcome Session: Your first day starts at 9:30 AM EST with a live virtual Welcome & Orientation session hosted by the People Operations team on Zoom.

Account Activation: Check your personal email for the Okta Single Sign-On (SSO) invitation link to set up your primary credentials and activate corporate email and Google Workspace access.

Multi-Factor Authentication (MFA): Register your hardware YubiKey or Google Authenticator app for two-factor authentication. SMS-based 2FA is prohibited under the Information Security Policy.

Slack Channels: Join standard team channels on Slack including #general, #announcements, #team-celebrations, #kba-internal-help, and your specific functional squad channel.

3. First Week Milestones (Days 1-5 Checklist)

Complete Compliance Training: Access the NovaTech Learning Portal and complete three mandatory training courses within your first 5 business days: (1) Information Security & Data Protection Awareness, (2) Workplace Diversity & Anti-Harassment, and (3) Corporate Code of Business Conduct.

Benefits Enrollment: Review health, dental, vision, life insurance, and 401(k) retirement matching plans in BambooHR. You have a 30-calendar-day enrollment window from your official hire date to finalize benefit selections.

Submit Home Office Stipend: Purchase eligible home office equipment (desk, chair, monitor) and submit receipts in Expensify for the \$1,000 one-time Home Office Equipment Stipend per the Remote Work Policy.

Onboarding Buddy Pairing: You will be paired with a seasoned Onboarding Buddy for your first 60 days. Schedule an introductory virtual coffee chat during your first week to learn team workflows, informal norms, and internal tooling tips.

4. First Month Milestones (Days 6-30)

Set Up Weekly 1-on-1s: Establish a recurring weekly 1-on-1 meeting cadence with your direct manager. Review team quarterly OKRs, sprint backlogs, and active product roadmaps.

Development Environment Setup: Engineering new hires should clone core GitHub repositories, configure local development containers using Docker, and request necessary AWS IAM roles or database read credentials via Jira Service Desk.

Day 30 Check-in: Conduct a formal 30-day alignment meeting with your manager to evaluate initial onboarding progress, review completed ramp-up tasks, and set 60-day project goals.

5. 60 and 90-Day Milestones & Probation Completion

Day 60 Milestone: Ship your first independent project, production feature, or technical document. Participate actively in sprint planning and team retrospectives.

Day 90 Probationary Review: Complete your formal 90-Day Probationary Review with

your manager and People Operations HR Business Partner. Successful completion transitions you from probationary status to regular full-time employee standing, unlocking international remote work eligibility.
